PROFESSIONAL & BUSINESS SERVICES CYBERSECURITY

# Keep client trust.

Confidential data protection, email and cloud security, privacy, managed SOC and fraud investigations for professional and business services firms.

## Three questions every firm leader should be able to answer

**Could a hijacked mailbox redirect a client payment?**

Phishing-resistant MFA, mailbox-rule monitoring and call-back checks decide whether BEC becomes a loss.

**Who could copy our client files tonight?**

Access reviews, data loss prevention and bulk-download alerts turn silent exfiltration into a caught event.

**Could we pass our biggest client's security audit?**

ISO 27001, SOC 2 and DPDP evidence decide whether the next mandate is renewed or lost.
