

Guard every key.

Smart contract audits, wallet and node security, blockchain forensics, managed SOC and compliance support for VDA exchanges, custodians, Web3 and DeFi projects and tokenisation platforms.

Three questions every digital asset leader should be able to answer

If our signing screen were altered tomorrow, would any signer notice?

Independent transaction decoding, hardware signer checks and signing policies decide whether a tampered approval is caught or executed.

Do we monitor every wallet we control, including operational ones?

A complete address inventory and on-chain monitoring decide whether a drain is stopped in minutes or found the next morning.

Has every contract upgrade been audited before it went live?

Independent audits, fuzzing and timelocked upgrades decide whether a one-line change stays harmless or becomes an exploit.

US\$3.4bn+

Stolen in crypto thefts in 2025

US\$1.5bn

Taken from Bybit in February 2025

50

VDA SPs registered with FIU-IND

6 hours

Incident reporting to CERT-In

Built for every layer of the digital asset stack

VDA exchanges and brokers · OTC desks · custodians and wallet providers · Web3 and DeFi projects · enterprise blockchain and tokenisation platforms · NFT marketplaces and Web3 gaming studios.

The rules that drive your security calendar

Instrument	Key cybersecurity expectations
PMLA · FIU-IND Guidelines 2026 · 2025 circular (2023–2026)	Registration, AML/CFT controls, CERT-In empanelled audit
CERT-In Directions · audit guidelines (2022, 2025)	6-hour reporting, logs, five-year KYC records
Income-tax Act · DPDP Act (2022–2026)	VDA tax and TDS, personal data safeguards

WHAT WE DO

Smart contracts, wallets, nodes, forensics, SOC and compliance

Smart Contract Audits

Ethereum, Solana and Polygon audits, DeFi risk and upgrade reviews.

Wallet & Key Security

Hot, cold, MPC and multisig wallets, HSMs and signing policies.

Node & Platform Testing

Exchange apps and APIs, nodes, RPCs, cloud and withdrawal paths.

Blockchain Forensics

Hack response, fund tracing, evidence and root cause analysis.

24/7 SOC & On-Chain Watch

Wallet, contract, account takeover and API abuse monitoring.

Compliance Support

CERT-In audits for FIU, AML control reviews, ISO 27001 and DPDP.

Choose your starting point

Foundation

Smart contract audit, web and wallet app test, admin key and upgrade review, launch-day monitoring. For Web3 start-ups, DeFi and NFT projects.

Assurance

CERT-In audit for FIU registration, exchange and API VAPT, wallet and custody review, managed SOC. For exchanges, brokers and wallet apps.

Continuous Resilience

Red team of withdrawal paths, MPC, HSM and key ceremony review, ISO 27001 and SOC 2, hack response retainer. For large exchanges, custodians and DLT platforms.

Why Codec Networks

CERT-In empanelled

for information security auditing services, and empanelled with NISCI for application audit services.

Certified

ISO 9001:2015, ISO/IEC 27001:2022 and ISO/IEC 20000-1:2018.

Regulation-mapped

Every finding mapped to the PMLA and FIU-IND's AML/CFT Guidelines and registration requirements, CERT-In's Directions and audit guidelines, the Income-tax Act, the IT Act, the DPDP Act and your agreements with banks and partners.

One connected partner

Testing, audits, SOC, forensics and privacy linked from finding to closure.

Book a scoping session

Share your platform, wallets, chains, contracts, partners and obligations. We will propose a practical audit, testing and monitoring plan for your digital asset business.
